WORK EXPERIENCE

FRONTEND ENGINEER

KWARA, NOVEMBER 2021 - PRESENT

Development and maintenance of the mobile product, Connect App, using ReactJS. The implementation of the latest redesign unlocked users from critical flows which contributed to the growth of the App from 2K to 40K active members.

FRONTEND ENGINEER

ATOMIC LABS, MARCH 2018 – OCTOBER 2021

Webapps and landing pages development with mobile-first approach and responsive products with standardized UX and UI elements to handle complex data in user friendly interfaces. Management and leadership of the Frontend Team.

SOFTWARE ENGINEER

EXPERTIS, JANUARY 2017 – MARCH 2018

Frontend development for Bib & Tucker E-commerce application. Bib & Tucker is a web-based uniform provider and management tool for the hospitality industry in New York. Used technologies: Django framework, JavaScript.

CO-FOUNDER

MAZAPPAN IT, JANUARY 2013 – DECEMBER 2016

Web and Mobile Development Studio. Animal Sphere was our first in-house mobile IOS app. It was rated top 5 Best App 2015 by The App Date Org. Animal Sphere created 2K pet lover community in Mexico City.

PROJECTS

Connect App, KWARA – Frontend Engineer

Kwara is a company that provides a modern banking backoffice for +120 credit unions and their members. Connect App allows over 40K members to easily access their accounts and perform transactions from their mobile devices. Technologies: ReactJS, Typescript, Cypress, Graphiti Spraypaint.

KAAX, Banco BASE – Frontend Engineer

Currency Exchange in real time platform. KAAX reduced trading time from hours to less than a minute and broker costs by 70%. Landing page and web development using: Next.js, Redux, GraphQL, Typescript, Saas and Websockets.
